FULL DETAILS OF NEW ADDITIONS - SEPTEMBER 2008

DVD ■ Intelligent Design: Unlocking The Mysteries Of Life - "Are we the most efficient machine in the universe - more complex and more powerful than any computer network?" An astonishing documentary clinically examines the scientific case for intelligent design - an idea with the power to revolutionize our understanding of life and to unlock the mystery of its origin. A group of contemporary scientists are advancing a controversial, but nevertheless powerful theory of "intelligent design" based upon compelling biochemical evidence. State of the art computer animations and microscopic photography of complex living systems clearly prove beyond any reasonable doubt that Darwin's "Theory Of Evolution" does not stand up to close scrutiny. It is impossible to ignore the precisely detailed hard evidence. £10

DVD ■ 9/11 Missing Links - The first film to expose the identity of the criminals responsible for 9/11. This two hour movie covers how 9/11 was orchestrated by the Jewish Criminal Network in conjunction with direct assistance from Israel. Missing Links will leave many people wondering why this information hasn't been covered by so-called 9/11 "Truthers". Using intelligence gathered from the FBI, CIA, NSA, United States Armed Forces Intelligence sectors, local law enforcement and independent investigators, Missing Links stands above the bog of speculation and mere conspiracy theory, and goes where no other 9/11 video has dared to. Explicit detail. £10

DVD ■ Nikola Tesla: The Genius Who Lit The World - Reveals the discoveries of a genius who was airbrushed from history by the scientific establishment, because his inventions were considered a little too revolutionary by government agencies and the power brokers of the time. Among his discoveries are: alternating current, fluorescent light, the laser beam, wireless communications, wireless transmission of electrical energy, remote control, robotics, Tesla's turbines and vertical take off aircraft. Tesla is the father of the radio and the modern electrical transmission system, registering over 700 patents worldwide. His vision included power from the sea, exploration of solar energy, the discovery of cosmic radio waves, and the use of the ionosphere for scientific purposes. He also foresaw interplanetary communications and satellites. Absolutely awesome information. £10

DVD ■ In Lies We Trust: The CIA, Hollywood & Bioterrorism - This controversial documentary examines the secret service's direction of Hollywood and will have you examining their impact on the way you now think about current events. It weaves famous Hollywood film footage with critical commentaries to show how and why people are being conditioned to accept new wars, deadly drugs, poisonous vaccines, making the population ill and killing millions of trusting victims throughout the World. Otherwise known as population reduction, or population control, the "War on Terror," like the "War on Cancer" and the "War on AIDS" affords policy-makers the cover to administer profitable depopulation manipulation under the guise of public health and national security. Compelling evidence. £10

DVD ■ Hoaglands Mars Volume 3: The Moon/ Mars Connection - On June 2, 1994 at Ohio State University, Richard C. Hoagland, former science consultant to NASA, presented publicly the results of his "Lunar extension of the independent Mars Investigation" using NASA's own data to make a compelling scientific case for the existence of ancient alien artifacts on the earth's nearest neighbour in the Solar System. As no one had done before, Hoagland uses state-of-the-art computer image processing and other analytical techniques to take the viewer into an extraordinary world of possible gigantic structures where NASA says there are none. Have some officials within the U.S. Government been hiding the truth about the moon for over thirty years? The Moon/ Mars Connection opens the mind to these amazing possibilities and has consequently been airbrushed from the official records. Stunning. £10
